

SUSPECTS LOGIC PUZZLE

WHO BUSTED SimMan?

Six recent healthcare graduates were sharing stories about their experiences in simulations, and how nervous they were before their first simulation. One graduate admitted how badly their first simulation went—they accidentally broke the school's brand new SimMan 3G!

So, the 3 men (Anthony, Greg, and Carlos) joined the 3 women (Eve, Patsy and Shannon) for some karaoke as they shared their stories—and each picked a song that reflected how they felt during that first simulation. Can you identify where each graduate is sitting at their table (they are all sitting on the same side, facing the karaoke stage), their profession, and the name of the song they selected?

From this, can you deduce who must have broken SimMan? Look out for clues all around the Expo... Visit each exhibitor and ask if they have a clue...

When you think you've figured it out, complete a ballot at the Expo registration desk!
